Winemaking Method	The wine was fermented following USDA Certified Organic protocols and aged in stainless steel to retain freshness before going through cold stabilization and filtration prior to bottling. The wine is fermented with native yeasts, does not go through malolactic fermentation, and has minimal sulfites added. Fermented dry.

Our Story

The founders of Daughters & Sons have (collectively) been involved in wine making for several decades now, and focus on minimal intervention winemaking to showcase each variety & vintage to its fullest, not manufacturing the same product year in and year out.

“Daughters & Sons” was created to provide a legacy in the wine business, but with a style of wine that reflects what we like about wine. So, we make the wine in a style that we also consume:

Simple wines made for family gatherings.
